2017 scheduled course offerings
All scheduled courses are taught in Mercyhealth's 25,000-square-foot Tactical Training Center in Janesville, WI, offering multiple scenarios – classrooms, nightclub, office, Emergency Department - state-of-the-art simulation labs and well-trained, DOJ-certified instructors and simulation staff.

Tactical Emergency Medical Support (TEMS)
This course incorporates lectures, practice and scenario-based training. Participants learn foundation principles, practices and skills necessary for providing medical support to law enforcement operations. Emphasis is on medical models and skills effective for supporting special operations teams during high-risk, large-scale and extended operations. Concepts and skills taught are also relevant to all law enforcement operations.

Length: 40 hours
Cost: TBD; visit MercyEMS.org for more information
Dates: October 24-27

Tactical Emergency Medical Support (TEMS) Advanced/Refresher
This 3 day course serves as a refresher for providers wishing to reinforce their tactical medical skills in a training environment. Participants refresh and advance their understanding of TEMS principals, practices and skills necessary for providing medical support to law enforcement operations. This is a great course to supplement previous TEMS training or serve as re-qualification for current providers. Prerequisite: Prior completion of a TEMS Course.

Length: 24 hours
Cost: $325
Dates: April 10-12

Tactical Emergency Casualty Care (TECC)
This course covers topics designed to decrease and treat preventable causes of death in the tactical environment. Topics include hemorrhage control, airway management, treatment of chest wounds, techniques for extracting casualties, introduction to rescue task force and much more.

Length: 8 hours
Cost: $100
Dates: January 21, July 17, March 13, May 23, September 5, November 8

Tactical Emergency Casualty Care (TECC) Advanced/Refresher
This course uses an extensive scenario-based approach with students conducting multiple casualty evaluations in a tactical environment. Prerequisite: Prior completion of a Tactical Emergency Casualty Care (TECC) course.

Length: 8 hours
Cost: $100
Dates: March 14, July 18, November 9

Additional courses available upon request*
Rescue Task Force (RTF)
RTF is an aggressive response to an active shooter incident that provides rapid medical treatment at the point of injury to those who are injured. It is a joint response between police and fire/EMS departments, but can be adapted to any agency, large or small, rural or urban. This training is ideal for front line EMS personnel and law enforcement officers. With basic understanding of language, roles and movements, trained persons will finish the class with a functional understanding and ability to perform this task.

Length: 4 hours
Dates: Available upon request
*Course offerings may have minimum class size requirements

Custom and on-site training
Mercyhealth Prehospital and Emergency Services Center offers an option to provide training on-site at your organization. On-site training is a flexible, cost-effective option that allows you to train as many or as few employees as you need—from a single team or department to everyone in your organization. We are committed to developing training and customizing any course or program we offer to meet the specific objectives of your organization.

Ready to bring industry-leading tactical training to your organization? Call the Mercyhealth Prehospital and Emergency Services Center at (608) 756-6182.
